

Editor's Message to Special Issue of Applications and the Internet in Conjunction with Main Topics of COMPSAC 2015

HIROYUKI SATO^{1,a)}

It is our great honour to have the special issue of “Applications and the Internet in Conjunction with Main Topics of COMPSAC 2015.”

The Annual International Computer Software & Applications Conference (COMPSAC), sponsored by IEEE Computer Society and also technically sponsored by Information Processing Society of Japan (IPSJ), is one of the premium international forums for academia, industry, and government to discuss research results, advancements and future trends in computer and software technologies and applications. COMPSAC 2015 is held with the theme of “Mobile and Cloud Systems – Challenges and Applications,” in Taichung, Taiwan, on July 1–5, 2015. Among a wide range of topics covered by COMPSAC, several symposia cover a broad range of networking and computing technologies as well as advanced applications and services. We planned this special issue to publish premium research contributions of these research areas presented in COMPSAC 2015 together with contributions related to the main topics of COMPSAC.

We received ten (10) submissions. Among those, we selected four (4) papers for publication. In addition to them, we invited two (2) papers from major researchers related to COMPSAC. Two prominent researchers around COMPSAC accepted our invitation: Professor Sheikh Iqbal Ahamed and his group of Marquette University, and Professor Motonori Nakamura and his group of National Institute of Informatics, Japan.

Finally, we would like to express our sincere gratitude to all the members of the editorial committee, who made great efforts to complete this special issue.
